

Guidelines for Project Demo Video

1. Duration

- Recommended Length: 8–10 minutes
- Maximum Length: 12 minutes

2. Video Structure

Section	Duration	Content
Introduction	30 sec	University, Department, Project Title, Group Members, Supervisor
Problem Statement	1 min	Explain the real-world problem and its significance
Objectives	30 sec	Main goals of the project
Technologies Used	30 sec	Database, AI/ML models Visualization, Hardware (if applicable)
Live Demonstration	5 min	Demonstrate all Functional Requirements Mentioned in Report
Results	1 min	Performance metrics, screenshots, graphs, accuracy, testing results

3. System Demonstration

This is the most important part.

Demonstrate:

- User Login
- Dashboard

- Core Features
- Reports
- Notifications
- AI Predictions
- Data Preprocessing
- Mobile App (if available)
- Admin Panel
- Outputs
- Database Updates

Avoid using screenshots when a live demonstration is possible. Focus on the primary user workflows and how the system solves the intended problem

4. Video Quality Requirements

- Full HD resolution
- Landscape orientation (16:9)
- Clear screen recording
- Smooth transitions
- No watermarks
- Stable recording

5. Audio Quality Requirements

- Clear voice
- Minimal background noise
- Use an external microphone if possible
- Speak confidently in English
- Explain Functional Requirements and Non Functional Requirements
